EDUCATION

Bachelor of Computer Science, Business Specialization (Co-op)

University of Waterloo

WORK EXPERIENCE

Microsoft

Dec 2023 - Present

Product Manager 2, Edge Web Platform

- **Drive product strategy** for Microsoft Edge DevTools, maintaining product quality and leading continuous improvement
- **Partner with Microsoft teams (Teams, Outlook)** to develop tooling solutions that addresses web app performance issues and **enhances developer workflows**
- **Manage customer feedback loop**, triaging issues, tracking resolution, and communicating product updates by authoring monthly articles
- Led launch of origin trials portal for web developers, streamlining the registration process and reducing manual overhead, which **improved third-party developer participation by 25%**
- **Designed and executed experimentation framework** for core user features (Find on Page), leveraging **A/B testing** to make data-driven decisions while maintaining high user satisfaction

Microsoft

Sept 2021 - Dec 2023

Product Manager, Edge Enterprise

- Launched Microsoft Edge management service from concept to market, simplifying browser management for **8000+ organizations** and **grew adoption** with new management features
- Defined **product vision and roadmap** based on customer insights and competitive analysis
- **Led design and user experience strategy**, creating high-fidelity prototypes using Figma
- Managed product launch including private preview and public release phases, **incorporating customer feedback** and **iterating designs** based on user needs
- Collaborated on the **go-to-market strategy** and created content for Microsoft Build and Ignite conferences, **driving awareness and adoption**

Microsoft

Jun 2020 - Aug 2020

Product Manager Intern, Edge Enterprise

- **Drove UI/UX strategy** for Microsoft 365 Admin Center feature development, replacing legacy administrative tools with modern user experience
- Conducted **user research interviews** with enterprise customers, collected feedback to improve and iterate designs, ensuring the product **aligned with customer needs**

ecobee

Sept 2019 - Dec 2019

Business Systems Developer Intern

- Built scalable data infrastructure using Kubernetes and Helm for efficient management and reliability

ThoughtWire

Jan 2019 - Apr 2019
